Matthew,

Can you come to the SLT Monday?

Alan

Alan,
Please ask Matthew to come to the SLT on Monday morning and give us his perspective on the chemical and his thoughts so that we are all on the same page. He can just stop by when his schedule allows between 9 and 11.

Thanks
Hiba

Tonya,

As the director of the Division working on methods, I thought you might like to see this request for mobile lab support.

Alan

Not for Public Dissemination

American Water is seeking additional mobile lab support assistance via WARN in the wake of the chemical spill in Charleston, West Virginia. Please see below and the attached document for more details.

Many of you have likely seen reporting on the chemical spill in Charleston, WV which has impacted the drinking water for the American Water's treatment and distribution systems.

The method and equipment specifications are attached.

If you have this capability please contact Nick Santillo, American Water, for further details and logistical arrangements.
